

Assignment 2

The following learning outcomes will be assessed:

1. Demonstrate an understanding and critical awareness of research project management concepts, techniques and tools
2. Independently plan and manage a research project on a topic which relates to the forefront of the academic area under study, assessing and developing plans to mitigate risk
3. Develop research project monitoring and approaches to assessing and evaluating research projects including the plan and protocols for assessing your project
4. Construct a project plan demonstrating an understanding and critical awareness of the social, ethical, legal and professional issues for research projects

Where referencing is required, unless otherwise stated, the Harvard referencing system must be used

Project, I have chosen:

Allergen filtered recipe searching

Web scraping techniques

Investigate the use of web-scraping techniques to provide a web-based tool that will allow users to search for recipes that can be filtered by the 14 allergen groups. So, for example, if someone had a Dairy and Wheat allergy, they could obtain a series of recipes that do not include those allergens.

Some references I have found:

Your Task

You are required to submit a well-structured implementation and delivery plan for your proposed research project.

Student Information

Throughout the module you have been undertaking a series of activities which have helped build the content required for this assignment and the necessary components required for your research project plan. The balance between sections may vary according to the specifics of your individual project but a guideline length of 3000 (+/- 10%) words overall is provided. Your research plan should include the following sections:

1. Introduction

A short introduction to your project, including your research aim, methodology and proposed outcome. This section is to provide context for your plan and should be no more than 300 words.

2. Project Schedule

You should consider the time frames for the project as well as number of hours, start/end dates for individual tasks and any deliverables. Your plan should be aligned to your chosen research methodology.

3. Requirements Documentation

You should detail suitable requirements documentation for project outcomes. Whilst this will be specific for the project, it should contain elements such as functional/non-functional requirements and user-centred elements such as user stories and/or PACT analysis.

4. Risk Mitigation

You should consider any risks associated with the project and discuss risk mitigation strategies you will employ to minimise their impact.

5. Proposed Evaluation

You should include details of how you propose to evaluate your project outcomes, including details of any proposed statistical analysis to be carried out. You should identify whether ethical approval will be required for your project and include the number of participants who will be required, together with details of who, how and where you will recruit them.

6. Project Monitoring Approach

You should include details of your proposed approach to project monitoring, together with any tools, templates and/or forms you will use for this purpose.

Submission Guidelines

Your submission should be spell checked and contain references where appropriate. You must use the Harvard style of referencing.

Assignment hand-in requirements are specified on the front cover sheet. The approximate time you should spend on this assignment is 30-50 hours.

Your assessment will be assessed according to the Generic Assessment Criteria, which are provided on the following pages.

Marking Rubric

The marks breakdown is as follows:

Introduction	(5 marks)
Project schedule	(30 marks)
Requirements Documentation	(20 marks)
Risk Mitigation	(10 marks)
Proposed Evaluation	(20 marks)
Project Monitoring Approach	(15 marks)

Refer to marking scheme below:

– Assignment 2 Marking Sheet

Name:

Student Registration Number:

Total Mark: %

	Mark Awarded	Available Marks
Introduction		5 marks
Project schedule		30 marks
Requirements Documentation		20 marks
Risk Mitigation		10 marks
Proposed Evaluation		20 marks
Project Monitoring Approach		15 marks

Postgraduate Generic Assessment Criteria Rubric

		Categories						
	Grade	Relevance	Knowledge	Analysis	Argument and Structure	Critical Evaluation	Presentation	Relevance to Literature
Pass	86 – 100%	The work examined is exemplary and provides clear evidence of a complete grasp of the knowledge, understanding and skills appropriate to the Level of the qualification. There is also unequivocal evidence showing that all the learning outcomes and responsibilities appropriate to that Level are fully satisfied. At this level it is expected that the work will be exemplary in all the categories cited above. It will demonstrate a particularly compelling evaluation, originality, and elegance of argument, interpretation or discourse.						
	76 – 85%	The work examined is excellent and demonstrates comprehensive knowledge, understanding and skills appropriate to the Level of the qualification. There is also excellent evidence showing that all the learning outcomes and responsibilities appropriate to that level are fully satisfied. At this level it is expected that the work will be excellent in the majority of the categories cited above or by demonstrating particularly compelling evaluation and elegance of argument, interpretation or discourse and some evidence of originality						
	70 – 75%	The work examined is of a high standard and there is evidence of comprehensive knowledge, understanding and skills appropriate to the Level of the qualification. There is clearly articulated evidence demonstrating that all the learning outcomes and responsibilities appropriate to that level are satisfied At this level it is expected that the standard of the work will be high in the majority of the categories cited above or by demonstrating particularly compelling evaluation and elegance of argument, interpretation or discourse						
	60 – 69%	Directly relevant to the requirements of the assessment	A substantial knowledge of relevant material, showing a clear grasp of themes, questions and issues therein	Comprehensive analysis - clear and orderly presentation	Well supported, focussed argument which is clear and logically structured.	Contains distinctive or independent thinking; and begins to formulate an independent position in relation to theory and/or practice.	Well written, with standard spelling and grammar, in a readable style with acceptable format	Critical appraisal of up-to-date and/or appropriate literature. Recognition of different perspectives. Very good use of a wide range of sophisticated source material.
	50 – 59%	Some attempt to address the requirements of the assessment: may drift away from this in less focused passages	Adequate knowledge of a fair range of relevant material, with intermittent evidence of an appreciation of its significance	Significant analytical treatment which has a clear purpose	Generally coherent and logically structured, using an appropriate mode of argument and/or theoretical mode(s)	May contain some distinctive or independent thinking; may begin to formulate an independent position in relation to theory and/or practice.	Competently written, with only minor lapses from standard grammar, with acceptable format	Uses a good variety of literature which includes recent texts and/or appropriate literature, including a substantive amount beyond library texts. Competent use of source material.
Pass	40 – 49%	Some correlation with the requirements of the assessment but there are instances of irrelevance	Basic understanding of the subject but addressing a limited range of material	Some analytical treatment, but may be prone to description, or to narrative, which lacks clear analytical purpose	Some attempt to construct a coherent argument, but may suffer loss of focus and consistency, with issues	Sound work which expresses a coherent position only in broad terms and in uncritical conformity to one or	A simple basic style but with significant deficiencies in expression or format	Evidence of use of appropriate literature which goes beyond that referred to by the tutor. Frequently only uses a

					at stake stated only vaguely, or theoretical mode(s) couched in simplistic terms	more standard views of the topic	that may pose obstacles for the reader	single source to support a point.
Fail	35 – 39%	Relevance to the requirements of the assessment may be very intermittent, and may be reduced to its vaguest and least challenging terms	A limited understanding of a narrow range of material	Largely descriptive or narrative, with little evidence of analysis	A basic argument is evident, but mainly supported by assertion and there may be a lack of clarity and coherence	Some evidence of a view starting to be formed but mainly derivative.	Numerous deficiencies in expression and presentation; the writer may achieve clarity (if at all) only by using a simplistic or repetitious style	Barely adequate use of literature. Over reliance on material provided by the tutor.
	30 – 34%	The work examined provides insufficient evidence of the knowledge, understanding and skills appropriate to the Level of the qualification. The evidence provided shows that some of the learning outcomes and responsibilities appropriate to that Level are satisfied. The work will be weak in some of the indicators.						
	15 – 29%	The work examined is unacceptable and provides little evidence of the knowledge, understanding and skills appropriate to the Level of the qualification. The evidence shows that few of the learning outcomes and responsibilities appropriate to that Level are satisfied. The work will be weak in several of the indicators.						
	0 – 14/%	The work examined is unacceptable and provides almost no evidence of the knowledge, understanding and skills appropriate to the Level of the qualification. The evidence fails to show that any of the learning outcomes and responsibilities appropriate to that Level are satisfied. The work will be weak in the majority or all of the indicators.
